

Colostroplex™

Bovine Colostrum Dietary Supplement

Therapeutic Uses

1. Restores gastrointestinal function and is thought to improve gastrointestinal immunity, therefore it has many uses
2. Impaired immune regulation
3. Bacterial gastroenteritis with diarrhea; chronic diarrhea
4. Food intolerance, candidiasis
5. May be a growth hormone potentiator, and helpful to “failure to thrive” children
6. Has been used experimentally for CMV retinitis, and Lyme disease

Administration

Internal: 1 to 4 tablets per day, between meals; use up to 6 tablets BID, for short-term use
60 tablets, 500mg, 60 day supply

Contraindications: Reduce dosage or take on alternate days if constipation occurs.

Ingredients

Bovine Colostrum Complex
IgG 25% Lactoferrin 7.1mg/gm IGF

Formula Rationale

Colostrum has been used for thousands of years in Asia and has been studied since the late 1700s in Europe. First milk colostrum is a pure and natural product resulting from collecting and drying the milk obtained within the first six hours after the birth of a calf. Our colostrum is collected from selected herds in six states in the United States to assure the highest potency product and to guarantee the newborn calf is not deprived.

Colostrum is rich in protein, specifically immune proteins classed as immunoglobulins, which provide the newborn or those using colostrum, with these basic components of the immune system. In the case of the newborn, their immune system is not yet fully functioning and colostrum source antibodies aid the immune system to ward off and defend against infections and antigens (bacteria, viruses, fungi, etc.).

Additionally, there are many vitamins in high concentrations along with rich sources of minerals in easy to assimilate forms. Recent research has proven the existence of TGF-1 (insulin like growth factor), which is of interest to the athletic and body-building field. Colostrum also contains a small molecular weight moiety called transfer factor (immune inducer), which is a messenger to the immune system preparing it for defense against specific antigens. This can be a very promising way to offer health benefits through an oral supplement, as it is small enough to be absorbed through the digestive system. The “Probiotic” functions of colostrum are well researched, and effectiveness against various G.I. problems, diarrhea, etc., is well established.

Colostroplex can be used for those who are intolerant of dairy products.

Clinical Notes

To reduce food intolerance use 1 to 2 tablets per day for 3 to 6 months.

Additional Formulas

- In the first stages of bacterial gastroenteritis **Isatis Gold** and **Quiet Digestion** can be used, with Colostroplex
- For cryptosporidium use **Source Qi** and **Artestatin**. (It is important to start Artestatin at 1 tablet per day, increase to 6 tablets per day over 3-week period.) Source Qi is used at the recommended dose of 4 to 6 tablets TID. Colostroplex can be used as an adjunct
- With damp heat diarrhea combine Colostroplex with **Formula H**, **Phellostatin**, or **Isatis Cooling**
- For rheumatoid arthritis, combine Colostroplex with **Mobility 2** and **Clear Heat**
- For parasitic infection, combine Colostroplex with **Artestatin** and **Aloe 22**
- Use long-term for Lyme disease
